

## Centennial Bifeng: Reviving Our Glory

Bifeng Elementary School is a century-old institution rich in precious history. As we stand at this moment of historical significance, we reflect on our past glorious achievements and look forward to a bright future.

Our school's vision of "Health, Care, Responsibility, Innovation" continually drives us to enhance educational capacity, strengthen the school environment and facilities, and foster a friendly school ethos. We believe this will further elevate our educational performance and revive our former glory.

### 1. Health: Cultivating Holistic Development

Health is the cornerstone of education. We are dedicated to promoting the physical and mental well-being of our students. Athletic performance is a highlight at Bifeng Elementary. Whether in school sports events or external competitions, our students consistently exhibit outstanding athletic talent and team spirit. These excellent performances stem from our emphasis on physical education. We offer a diverse array of physical education courses, ranging from track and field to ball sports, meticulously designed to help every student find their interest and build a strong physique.

### 2. Care: Creating a Warm and Harmonious Campus

At Bifeng Elementary, care is a culture and an action. We prioritize the moral education of every student, advocating for a campus atmosphere of respect, inclusion, and mutual assistance. Here, students learn to care for others, respect teachers, and actively participate in community service and public welfare activities, becoming

conveyors of positive social energy. Our campus is filled with love and care, which is part of our education and our pride.

### 3. Responsibility: Cultivating Future Leaders

A sense of responsibility and leadership are central to our education. Our faculty not only possesses noble ethics but also actively engages in various professional development and training activities to continually enhance their teaching skills. We regularly hold professional training sessions, encouraging teachers to exchange learning experiences and update their educational concepts and methods. Through the tireless efforts of our teachers, students subconsciously learn to take on responsibilities and develop good leadership skills, preparing them well for future challenges.

### 4. Innovation: Leading a New Direction in Education

Innovation is the driving force behind Bifeng Elementary's development. We continually improve campus facilities, enhance both hardware and software infrastructure, and create a modern, friendly learning environment. The school has introduced advanced technological equipment, established digital classrooms, and enriched digital resources, allowing students to fully utilize modern technology in their studies to improve learning efficiency. Additionally, we encourage students to participate in innovative experiments and projects, nurturing their creativity and critical thinking, enabling them to stand out in future societies.

To provide students with a better learning environment, we continually invest resources in improving campus facilities. Classrooms are equipped with modern multimedia teaching equipment, the library has been updated with a rich collection of

books, sports facilities are complete, and creative classrooms have been set up. These changes not only enhance teaching quality but also stimulate students' interest in learning and their spirit of exploration.

Besides focusing on the enhancement of hardware and software facilities, we are dedicated to establishing a friendly and harmonious campus environment. The school has a play therapy room to provide professional psychological support for students, helping them resolve challenges in learning and life. We have also established comprehensive safety measures to ensure that every moment on campus is safe and pleasant for students.

The century-long school history has endowed Bifeng Elementary with rich experience and shaped its unique educational culture. But we will not rest on our laurels. Bifeng Elementary will continue to uphold the vision of "Health, Care, Responsibility, Innovation" and move forward. We remain committed to the all-round development of our students, promoting educational innovation, and continuously improving educational quality, paving a bright path for each student's future.

At this juncture, I, Principal Wen Fu-Rong, sincerely thank all the teachers, parents, alumni, and friends from all walks of life who have worked hard for Bifeng Elementary. It is your support and efforts that have allowed us to continuously advance on this educational journey and achieve today's successes. Let us join hands and stride towards an even more glorious future!

Sincerely,  
Principal Wen Fu-Rong
